

**The Best Graffiti Removers
on the Planet!**

*We will make you the
Graffiti Removal Specialists ...*

**... WITH OUR BATTLE HARDENED
LINE-UP OF GRAFFITI BLASTERS!**

OUR SOLUTIONS!

POROUS SURFACE BLASTER

Unlike most products on the market, you do not need a second product to remove shadows! Just re-apply a second time and remove! Blasts graffiti off brick, concrete, slate, stucco, marble, granite, terra cotta, cinder blocks, terrazzo, cement, railroad cars, postal boxes, glass, wood & stone. Also works great on marking pen and permanent marker!

CITRUS BLAST

An effective but gentle product for painted and smooth surfaces. Cuts through most graffiti in as little as 15 to 60 seconds. Works great on most metals, glass, fiberglass, polished stone, porcelain & clear coat surfaces such as found on automobiles. Covers two or more times the square footage of thickened products. This citrus based product is faster and safer than most products on the market.

RHINO BLAST

Rhino Blast is a thicker heavier formula for those hard to remove graffitis. Blasts graffiti off brick, concrete, slate, stucco, marble, granite, terra cotta, cinder blocks, terrazzo, cement, railroad cars, postal boxes, glass, wood & stone. Also works great on marking pen and permanent marker!

UNDERCOAT & METALLIC PAINT REMOVER

Specially formulated product designed to attack undercoat & metallic paint on porous & hard durable surfaces. Works well on glass, fiberglass, polished stone, porcelain, most metals and clear-coat surfaces.

All of our graffiti products are biodegradable.

CLEANSWEEP ONE

This product can be used as a final cleanup when you remove graffiti from stone or brick surfaces to help control the shadow that occurs from salt leaching out of the stone or brick. It can also be used to remove efflorescence from stone and brick. Product **must** be rinsed off with water.

CLEANSWEEP TWO

This product was formulated to be used after the graffiti is removed; it cleans the surface to get it as clean and shiny as possible. It can also be used as a very effective glass cleaner as it helps to remove the residues from these surfaces.

POROUS SURFACE GRAFFITI REMOVERS WORK ON:

Brick, Concrete, Slate, Stucco, Marble, Granite, Terra Cotta - Cinder Blocks,
